Current Date	Nominator's Name (Service Receiver)	Nominee's Name (Service Provider)

Applicant E-mail Address (Primary Contact)

Is this a self nomination

Yes

No

Other E-mail Address (Secondary Contact)

Who Can Apply:

1. Organizations (nominators) can nominate a key service provider (nominee) for recognition. The nominee should make a definitive contribution to the success of the nominating company's waste management plan.

2. Service providers (self-nominated) with a strong track record of providing quality services and/or products that contribute to the success of their clients' waste management strategies.

Service provider can be a fully integrated waste management company, a specialty waste treatment organization (organics, chemicals etc.), custodial services provider, niche recycler, management systems developer or any other company or individual playing a significant role in the waste programming of the client organization.

Provide a brief description of the nominee's organization. (max. 500 word)

Include the following details:

1. Company Name and full contact information
2. Type of organization and its primary function.
2. Number of permanent and temporary employees in the reporting location.
3. Years in business
4. Number of years in the partnership

1. Services Provided:

List the range of services provided to client organizations (Example: custodial staffing, waste collection, specialized recycling, program design and implementation, other)

2. Program Delivery & Innovation

Provide details of the waste reduction program(s) designed for the client and how the program(s) contributes to the better management of waste streams and the overall environmental goals of the client organization. Describe any innovative elements that set the program apart from its competitors.

3. Monitoring & Measurement

Describe the mechanisms by which the outcomes of the implemented program(s) are determined. Is tracking done by the service provider, the client company or both?

Provide quantitative data for Reduction, Reuse and Recycling results in successful program implementations. For any solid waste data, use the fields below to report tonnage. Use general response field to report other elements such as water, air, chemicals etc.

Materials Reduced (metric tonnes)

Materials Reused (metric tonnes)

Materials Recycled (metric tonnes)

4. Communications & Training

a. How is the message of 3Rs integrated into the programming to assist clients in becoming more waste aware?

b. What types of training and/or communications are used to train employees of the service provider (i.e. custodial staff)

 (Example: newsletters, regular training for custodial staff, lunch & learn information sessions, creative signage, recognition etc.

5. Continuous Improvement.

Over the term of the partnership has there been consistent improvement in the quality and outcomes of the services provided. Provide details on this improvement. Have there been any recent leaps in innovation that have dramatically improved outcomes to any of the key services reported in Question 1? Describe the particular innovation and the outcomes.

Report any quantifiable results from these improvements.

Please use the following fields to attach any collateral, graphics etc. that supports the application. Each field has a 20 MG limit
